

America II is one of the world's largest distributors of semiconductors and electronic components. America II offers the most complete range of products, from active, passive and electromechanical components to memory and specialty products. All from the world's top manufacturers.

America II is a global leader in component distribution. America II stocks more than four billion components and is one of the world's largest distributors of semiconductors and electronic components. Through America II franchise and direct distribution lines, America II serves as a primary partner for all OEM and EMS customers. Headquartered in St. Petersburg, Florida and with offices in the UK, Germany, China, Japan, Singapore and Mexico, America II also provides value-added services and inventory solutions from ISO 9001:2008 and ESD-certified 420,000 square foot North American distribution facility.

America II helps our OEM and EMS customers deliver innovative technology to the world. As a global distributor, America II supplies parts for virtually any application including: automotive, personal computing and storage, white goods, industrial, military/aerospace, lighting, mobile/wireless, telecommunications, medical, smart technologies, consumer electronics, the Internet of Things (IoT), and so much more.

Our objective is to bring value to our customers' supply chain.

As a result, we developed a line card that includes the products and manufacturers our customers can depend on. We are franchised on the following:
